

Prince Kumar — Software Engineer I

Jeet Ram Colony Bhangel – Noida, Uttar Pradesh 201304 – India

📞 +91 8210739077 • ✉ princekumar1837@gmail.com • in prince-kumar-6ab420175

Technical: Node Js, Express Js, TypeScript, JavaScript, MongoDB, MongoCompass, SQL, PostgreSQL, pgAdmin, DBeaver, Unit testing, Bitbucket, gitlab, Checkmarx, Blackduck, sonarcube, Docker, AWS, Python, Basic Java, Groovy, Jenkins, Redis, Elasticsearch, Jira, VS code, IntelliJ Idea

Organisational: Leadership; Proactive approach; Team collaboration; Problem-solving; Decision-making.

Personal: Relationship building; Encouraging teamwork.

Work Summary

Experienced Software Engineer with over 5+ years of expertise in backend development and web technologies. Proficient in leveraging technologies like Node.js, Express.js, TypeScript, SQL, and NoSQL to build scalable and efficient solutions. Demonstrated success in handling the full project lifecycle, from planning and development to deployment and maintenance, across diverse industries including GIS and e-governance. Skilled in CI/CD pipelines, unit testing, and database management, with a strong focus on delivering results within tight deadlines and budget constraints. Adept at problem-solving, team collaboration, and stakeholder communication, with a commitment to continuous learning and innovation in software development.

Work Experience

Precisely Software, LLC

Software Engineer I

India

Feb 2023 – Present

- **Geo-coding & Addressing (Master Location Data - MLD)** Apr 2024 – Present
 - **Product Description:** Master Location Data (MLD) is a comprehensive location intelligence framework designed to improve geocoding accuracy and data quality by integrating and maintaining multi-source location datasets.
 - **Responsibilities:**
 - Implemented and enhanced MLD framework features using Java, Groovy, Jenkins, SQL, and Python.
 - Optimized multi-source datasets to improve address matching accuracy and reduce data staleness.
 - Investigated and resolved complex data quality and processing issues, ensuring data integrity and reliability.
 - Collaborated with global teams to enhance geocoding capabilities and streamline data processing workflows.
- **MapReveal & MapReveal Collect** Feb 2023 – Mar 2024
 - **Product Description:** A GIS platform that enables real-time tracking, monitoring, analysis, collection, and publication of geospatial data through web and mobile applications.
 - **Responsibilities:**
 - Developed GIS web applications using Node.js, MongoDB, Redis, Elasticsearch, Socket.IO, and MapTiler.
 - Designed and implemented scalable backend services and REST APIs for geospatial data processing.
 - Resolved GIS-related production issues and improved platform stability and performance.
 - Contributed to feature development, deployment activities, and ongoing product enhancements.

Transerve Technologies

Software Engineer

India

Nov 2020 – Jan 2023

- **TOS & CityOS** Jan 2022 – Jan 2023
 - **Product Description:** Smart city and GIS-based platforms designed to manage urban infrastructure, location intelligence, field operations, and geospatial workflows.
 - **Responsibilities:**
 - Developed backend services and APIs using Node.js, Express.js, MongoDB, Redis, and GIS technologies.
 - Integrated geospatial datasets and implemented location-based functionalities.
 - Participated in application deployment, troubleshooting, and performance optimization activities.
 - Collaborated with cross-functional teams to deliver scalable and maintainable GIS solutions.
- **Fecal Sludge & Septage Management (FSSM)** Jul 2021 – Dec 2021
 - **Product Description:** An e-governance platform developed for Urban Local Bodies (ULBs) in Tamil Nadu to streamline desludging operations, service tracking, and citizen service delivery.
 - **Responsibilities:**
 - Developed and maintained service-oriented applications using Node.js, Express.js, and SQL.
 - Designed and implemented RESTful APIs to support operational workflows.

- Performed code reviews, debugging, and issue resolution to maintain service reliability.
 - Worked closely with stakeholders to implement new features and process improvements.
- **Property Tax Management System (PTMS)** Nov 2020 – Jun 2021
- **Product Description:** A property tax management platform that automates tax assessment, billing, payment tracking, and compliance processes for local government authorities.
 - **Responsibilities:**
 - Developed and maintained backend applications using Node.js, Express.js, and MongoDB.
 - Designed and deployed RESTful APIs and backend services.
 - Participated in code reviews and resolved production issues to improve system performance.
 - Delivered new features while ensuring adherence to business and regulatory requirements.

Certifications

2024: CI/CD Pipeline Builder

2022: AWS Deployment

Education

Swami Vivekanand Subharti University (SVSU)

Meerut, India

Bachelor of Computer Application (BCA)

2020–2024

- Focused on software development, database systems, and computer networks.
- Built key projects such as a **web-based library management system** and a **personal expense tracker application**.
- Actively involved in group projects and hackathons, enhancing team collaboration skills.
- **Technical skills:** Javascript, Python, SQL, JavaScript, Git, and GitHub.

Navgurukul (NGO)

Directorate General of Training (DGT)

Software Engineering Program

2018–2020

- Completed an **intensive 1.5-year residential software engineering program** for underprivileged students.
- Selected through a **rigorous multi-stage interview process**.
- Specialized in **web development** using Node.js and JavaScript.
- Collaborated on real-world projects utilizing **agile methodologies**.
- Conducted peer learning sessions and contributed to community-building initiatives.
- **Technical stack learned:** JavaScript, Node.js, Express.js, MongoDB, Git, and GitHub.

S.M.D. College

Patliputra University

Higher Secondary School (XII)

2016–2018

- Focused on Mathematics and Computer Science.
- Participated in school-level **science exhibitions** and **debate competitions**, enhancing analytical and communication skills.
- Developed an early interest in technology, motivating a career in software engineering.

Additional Details

Date of Birth: 21st Feb 2000

Nationality: Indian

Languages: English, Hindi

Gender: Male

Declaration

I hereby declare that the information provided is accurate to the best of my knowledge.
